

School Cleaning

The Custodial team would like to share some insight into cleaning and the Pandemic:

- According to the CDC, “The fomite transmission of SARS-CoV-2 is low compared to direct contact, droplet transmission, or airborne transmission.” As we understand this variant is airborne and surface contamination is a low priority.

The update School Cleaning Protocol is found at [Bend-La Pine Schools COVID-19 Cleaning Protocols](#). The protocol also stated that, “Each classroom in our schools will be provided with approved cleaning products by the custodial staff. “We will keep providing equipment whether its spray solution and micro fiber in each classroom or cleaning stations with flat mops, solution to dip in, spray bottles and rags, or having both. This will provide your staff with the products to disinfect if needed in their classroom.

- The custodial team will try their best with the resources available to go above their regular cleaning schedule and sanitize the high touch spots. We are putting more effort into your high traffic areas, bathrooms, hallways, commons etc.
- If there is district approved product or cleaning equipment your staff needs let your Head Custodian know so we can provide that for you to make your team successful.

Thanks,
Walter Norris, Assistant Director of Custodial
Rob Johnson, Custodial Field Supervisor
